Securities code: 4549 (TSE 1st Section)

Notice regarding the Affect of the Pacific Coast of Tohoku Earthquake

Our group offers its deepest condolences to everyone affected by the Pacific Coast of Tohoku Earthquake which occurred on March 11th, 2011. It is our heart's deepest hope that those impacted by the earthquake will be able to recover as quickly as possible.

Our group has been affected by the earthquake as described below.

1. Damage

We have now confirmed that none of our staff members suffered any physical harm from the earthquake.

As for our operations that are located in and around the vicinities of the earthquake, we have suffered some damage to our fixtures and furnishings, but as infrastructure lifelines and transportation networks have been gradually undergoing repair, we have also been able to resume our activities in such areas.

Our manufacturing, distribution, and research facilities located in Tochigi Prefecture as well as manufacturing facilities in Chiba Prefecture have suffered damage with respect to some of their manufactured goods, fixtures, and furnishings, but none of these damages has affected our operations or our ability to supply our products. Therefore, we are carrying out continuous and uninterrupted business operations to ensure a stable supply of goods to our customers.

2. Affect on Business Performance

We are still working to confirm the extent of damage and affect on our operations located in and around the vicinities of the earthquake. As necessary, we will issue prompt announcements regarding any situation that impacts our business performance.
